Independent Auditors' Report

To the Board of Directors of Great Wall Enterprise Co., Ltd.:

Opinion

We have audited the consolidated financial statements of Great Wall Enterprise Co., Ltd. and its subsidiaries ("the Group"), which comprise the consolidated balance sheets as of December 31, 2021 and 2020, the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the International Financial Reporting Standards ("IFRSs"), International Accounting Standards ("IASs"), Interpretations developed by the International Financial Reporting Interpretations Committee ("IFRIC") or the former Standing Interpretations Committee ("SIC") endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audit in accordance with the Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Revenue recognition

Please refer to Note 4(p) and Note 6(aa) "Revenue from contracts with customers" from the financial statements.

Description of key audit matter: Due to the industry characteristics of the Company and following the rules set by competent authorities to announce operating income monthly, revenue recognition timing risk is increased.

How the matter was addressed in our audit:

Our principal audit procedures include:

- Understanding whether the accounting policies implemented by the audited company is appropriate
- Testing the Company's controls and transaction cycle from order to payment regarding revenue recognition
- Performing detailed tests on the verification of sales revenue, and sampling payments or original certificates after the verification period
- Selecting the appropriate sample size in accounts receivable and sending external confirmations
- Appraising whether sales revenues occur during appropriate periods

2. Investment impairment using the equity method

Please refer to Note 4(o) Impairment of Non-financial Assets in the financial report for the accounting policy for investment impairment using the equity method. For the accounting judgments regarding investment impairment assessment using the equity method, please refer to Note 5 in the report. For more information on asset impairment, please refer to Note 6(l) Property, plant, and equipment and Note 6(m) Right-of-use assets.

Description of key audit matter: Constituent entities of subsidiaries using the equity method have continuously incurred net losses in recent years, hence the management believes that there are signs of impairment in related fixed assets. The management adopts the value-in-use method to estimate the future discounted cash flow to evaluate the recoverable amount of the identifiable cash-generating unit to which the relevant fixed assets belong, and considers whether to reverse or increase the previous year's set amount. The preparation of future discounted cash flow data involves significant management judgments, especially when estimating the gross profit margin and revenue growth rate and determining its appropriate discount rate. Therefore, factors such as the gross profit margin, revenue growth rate and discount rate are inherently uncertain and involve possible management deviations.

How the matter was addressed in our audit:

Our principal audit procedures include:

- Assessing the significant cash-generating units recognized by the management of the Company as showing signs of impairment
- Comparing the main financial information used for its future discounted cash flows with relevant information in the financial budget approved by the management authority, including operating income, operating costs and operating expenses; and then comparing the financial budget prepared in the previous year with the current year's performance in order to evaluate the accuracy of its forecasts while discussing with the management the reasons for the significant differences, and whether it has been taken into consideration in this year's budget
- Comparing the key assumptions used in estimating future discounted cash flows including the estimated long-term income growth rate and profit margin of each cash-generating unit with comparable companies in the industry and external market data, and appointing internal evaluation experts to evaluate whether the discount rate used for future cash flows falls within the range adopted by the industry
- Performing sensitivity analysis on key assumptions (including income growth rate and discount rate) adopted for future discounted cash flows to evaluate the impact each cash-generating unit has on the net present value; and evaluating the impact of changes in key assumptions on the conclusions obtained and whether there are deviations from the management authority.

Other Matter

Great Wall Enterprise Co., Ltd. has additionally prepared its parent-company-only financial statements as of and for the years ended December 31, 2021 and 2020, on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRSs, IASs, interpretation as well as related guidance endorsed by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Phoebe Chung and Melody Chen.

- (u) In addition to the permitted businesses, the Group may operate in businesses that are not prohibited or restricted by laws and regulations.

(2) Approval date and procedures of the consolidated financial statements:

These consolidated financial statements were authorized for issue by the Board of Directors on March 25, 2022.

(3) New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from January 1, 2021:

- Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"
- Amendments to IFRS 9, IAS39, IFRS7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform—Phase 2"

The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from April 1, 2021:

- Amendments to IFRS 16 "Covid-19-Related Rent Concessions beyond June 30, 2021"
- (b) The impact of IFRS issued by the FSC but not yet effective

The Group assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2022, would not have a significant impact on its consolidated financial statements:

- Amendments to IAS 16 "Property, Plant and Equipment Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts—Cost of Fulfilling a Contract"
- Annual Improvements to IFRS Standards 2018–2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"

Notes to the Consolidated Financial Statements

(c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The Group does not expect the following new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its consolidated financial statements:

- Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"
- Amendments to IAS 1 "Disclosure of Accounting Policies"
- Amendments to IAS 8 "Definition of Accounting Estimates"
- Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"

(4) Summary of significant accounting policies:

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (hereinafter referred to as "the Regulations") and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations endorsed and issued into effect by the Financial Supervisory Commission, R.O.C..

(b) Basis of preparation

(i) Basis of measurement

Except for the following significant accounts, the consolidated financial statements have been prepared on a historical cost basis:

- 1) Financial instruments at fair value through profit or loss are measured at fair value;
- 2) Financial assets at fair value through other comprehensive income are measured at fair value;
- 3) Biological assets are measured at fair value less costs to sell;
- 4) The defined benefit liabilities (assets) are measured at fair value of the pension fund assets less the present value of the defined benefit obligation, limited as explained in note 4(q).

(ii) Functional and presentation currency

The functional currency of each Group entity is determined based on the primary economic environment in which the entity operates. The consolidated financial statements are presented in New Taiwan Dollar (NTD), which is the Company's functional currency. All financial information presented in NTD has been rounded to the nearest thousand.

Notes to the Consolidated Financial Statements

(c) Basis of consolidation

(i) Principles of preparation of the consolidated financial statements

The consolidated financial statements comprise the Company and subsidiaries. Subsidiaries are entities controlled by the Group. The Group 'controls' an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases. Intragroup balances and transactions, and any unrealized income and expenses arising from Intragroup transactions are eliminated in preparing the consolidated financial statements. The Group attributes the profit or loss and each component of other comprehensive income to the owners of the parent and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

The Group prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumstances.

Changes in the Group's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received will be recognized directly in equity, and the Group will attribute it to the owners of the parent.

- (ii) Changes in the Group's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received will be recognized directly in equity, and the Group will attribute it to the owners of the parent.

Note: Food China Inc., FoodChina Global Co. Ltd., and Beijing FoodChina Global Information & Technology Ltd. were associates at June 30, 2020, and thus were not included in the consolidated financial statements.

When preparing the consolidated financial statements, the company's investments in its subsidiaries represented as shareholder equity have been written off, and significant transactions during the period have been eliminated.

2) Changes in subsidiaries included in the consolidated financial statements:

In the first quarter of 2021, Shanghai All-Household Restaurant Management Co., Ltd. was established, wherein the Group has a shareholding of 50% with control. Therefore, it is listed in the consolidated financial statements.

In the third and fourth quarter of 2021, the Group obtained 10% of non-controlling interest of Oriental Best Foods Co., Ltd., resulting in its shareholdings to increase to 100%.

In the third quarter of 2021, the Group did not proportionately subscribe for new shares of ANT Food Co., Ltd. according to its prior shareholding ratio, resulting in its shareholdings to decrease to 27.27%.

Notes to the Consolidated Financial Statements

In the third quarter of 2021, the Group acquired 35.31% of non-controlling interest of its subsidiaries, Food China Inc., FoodChina Global Co. Ltd., and Beijing FoodChina Global Information & Technology Ltd., resulting its shareholdings to increase to 90.34%.

In the fourth quarter of 2021, the Group underwent restructuring. Great Wall Northeast Asia Corporation, which the Group indirectly held 52.04% shares, began to directly hold 65.1% of its subsidiaries, Asia Nutrition Technologies (VN) Investment Co., Ltd., Asia Nutrition Technologies (HN) Co., Ltd., Asia Nutrition Technologies (VN) Co., Ltd., Asia Nutrition Technologies (LA) Co., Ltd., and Asia Nutrition Technologies (MV) Co., Ltd. In addition, all shares of ANT Feed Co., Ltd., wherein the Group held 52.4% shares, alongside with Marksville Corp. and Great Wall Nutrition Technologies SDN.BHD, whose shares were fully owned by the Group, were transferred to Great Wall International (Holdings) Co., Ltd., wherein the Group held its entire shares.

Due to the organizational restructuring, the Group's shareholdings in its subsidiaries, Dachan (Asia Pacific) Limited and Dachan (VN) Company Limited, increased to 80.54%

In the first quarter of 2020, the Group obtained 30% of non-controlling interest of KouChan Mill Co., Ltd., resulting its shareholdings to increase to 85%. In the second quarter of 2020, the Group did not proportionately subscribe for new shares of KouChan Mill Co., Ltd. according to its prior shareholding ratio, resulting in its shareholdings to decrease to 55%.

In the first quarter of 2020, Neo Foods Co., Ltd. was established, wherein the Group has a shareholding of 100%.

In the first quarter of 2020, Green Pac (Fujian) Biological Technology Co., Ltd. was liquidated.

In the second quarter of 2020, Great Wall Grains International Limited was established, wherein the Group has a shareholding of 100%.

In the second quarter of 2020, the company did not proportionately subscribe for new shares of Zhong Yi Food Co., Ltd. according to its prior shareholding ratio, resulting in its shareholdings to decrease to 65%.

In the second and third quarter of 2020, the company did not proportionately subscribe for new shares of Danchen (Asia Pacific) Limited and Dachan (VN) Company Limited according to its prior shareholding ratio, resulting in its shareholdings to decrease to 77%.

In the third quarter of 2020, the subsidiary Huabang (Tianjin) Biotechnology Co., Ltd. was liquidated.

In the third quarter of 2020, the company disposed of all shares of Shandong Luhuan Biotechnology Co. Ltd and lost control.

In the third quarter of 2020, subsidiaries Fresh Aqua Limited, Global Seafood Limited, Pacific Harvest Limited, Seafood International Limited, and Universal Food Limited were established, wherein the Group has a shareholding of 100%.

Notes to the Consolidated Financial Statements

In the third quarter of 2020, the company acquired more shares of Food China Inc., FoodChina Global Co. Ltd., and Beijing FoodChina Global Information & Technology Ltd., resulting in its shareholdings to increase to 55.03%. Therefore, the company gained control, and was thus included in the consolidated financial statements.

In the forth quarter of 2020, the company disposed of all shares of its subsidiary Univeral Food Corp. and lost control.

In the forth quarter of 2020, the company disposed of all shares of its subsidiary Qingdao Dachan Technologies Feed Co., Ltd. and lost control.

In the forth quarter of 2020, Green Pac Bio Co., Ltd. was liquidated.

3) Subsidiaries excluded from the consolidated financial statements: None.

(d) Foreign currencies

(i) Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of Group entities at the exchange rates at the dates of the transactions. At the end of each subsequent reporting period, monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at that date.

Non-monetary items, assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated into the functional currencies using the exchange rate at the date that the fair value was determined. Non monetary items denominated in a foreign currency that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Exchange differences arising on retranslation are generally recognized in profit or loss, except for those differences relating to the following, which are recognized in other comprehensive income:

- 1) (Available for sale) equity investment in equity securities designated as at fair value through other comprehensive income;
- 2) A financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective

(ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into the reporting currency at the exchange rates at the reporting date. The income and expenses of foreign operations, excluding foreign operations in hyperinflationary economies, are translated into the presentation currency at the average exchange rate. Exchange differences are recognized in other comprehensive income and presented in the foreign currency translation reserve in equity.

Notes to the Consolidated Financial Statements

When a foreign operation is disposed of such that control, significant influence, or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non controlling interests. When the Group disposes of only part of its investment in an associate or joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

When the settlement of a monetary receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, foreign exchange gains and losses arising from such a monetary item that are considered to form part of the net investment in the foreign operation are recognized in other comprehensive income.

(e) Classification of current and non-current assets and liabilities

An asset is classified as current under one of the following criteria, and all other assets are classified as non current.

- (i) It is expected to be realized, or intended to be sold or consumed, in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be realized within twelve months after the reporting period; or
- (iv) The asset is cash or a cash equivalent (as defined in IAS 7) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

An entity shall classify a liability as current when:

- (i) It is expected to be settled in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is due to be settled within twelve months after the reporting period; or
- (iv) The Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.

(f) Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits which meet the above definition and are held for the purpose of meeting short term cash commitments rather than for investment or other purposes should be recognized as cash equivalents.

Notes to the Consolidated Financial Statements

Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

(g) Financial instruments

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Group becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

On initial recognition, a financial asset is classified as measured at: amortized cost; Fair value through other comprehensive income (FVOCI) – debt investment; FVOCI – equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

1) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- · it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Fair value through other comprehensive income (FVOCI)

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

• it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

Notes to the Consolidated Financial Statements

• its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an instrument-by-instrument basis.

Debt investments at FVOCI are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in other comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to profit or loss.

Equity investments at FVOCI are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in other comprehensive income and are never reclassified to profit or loss.

Dividend income is recognized in profit or loss on the date on which the Group's right to receive payment is established.

3) Fair value through profit or loss (FVTPL)

All financial assets not classified as amortized cost or FVOCI described as above are measured at FVTPL, including derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost or at FVOCI, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

4) Business model assessment

The Group makes an assessment of the objective of the business model in which a financial asset is held at portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- · how the performance of the portfolio is evaluated and reported to the Group's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;

Notes to the Consolidated Financial Statements

• the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, and are consistent with the Group's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

5) Assessment of whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial assets on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- · contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable rate features;
- · prepayment and extension features; and
- · terms that limit the Group's claim to cash flows from specified assets(e.g. non-recourse features)
- 6) Impairment of financial assets

The Group recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, amortized costs, notes and trade receivables, other receivables, guarantee deposit paid and other financial assets).

The Group measures loss allowances at an amount equal to lifetime ECL, except for the following which are measured as 12-month ECL:

- · debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Notes to the Consolidated Financial Statements

Loss allowance for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and informed credit assessment as well as forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 90 days past due.

The Group considers a financial asset to be in default when the financial asset is more than 365 days past due or the debtor is unlikely to pay its credit obligations to the Group in full.

The Group considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade which is considered to be BBB- or higher per Standard & Poor's, Baa3 or higher per Moody's or twA or higher per Taiwan Ratings'.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 month after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

At each reporting date, the Group assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial assets is credit-impaired includes the following observable data:

- · significant financial difficulty of the borrower or issuer;
- · a breach of contract such as a default or being more than 90 days past due;
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;

Notes to the Consolidated Financial Statements

- it is probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt securities at FVOCI, the loss allowance is charge to profit or loss and is recognized in other comprehensive income instead of reducing the carrying amount of the asset.

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off the gross carrying amount when the financial asset is 365 days past due based on historical experience of recoveries of similar assets. For corporate customers, the Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

7) Derecognition of financial assets

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

When the Group signs a transaction to transfer financial assets, if it retains all or almost all risks and rewards of ownership of the transferred assets, they will continue to be recognized on the balance sheet.

(ii) Financial liabilities and equity instruments

1) Classification of debt or equity

Debt and equity instruments issued by the Group are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

Interests and losses or benefits related to financial liabilities are recognized as profit and loss, and reported as financial costs under non-operating income and expenses.

Notes to the Consolidated Financial Statements

Financial liabilities are reclassified into equity at the time of conversion, and the conversion does not generate profit or loss.

3) Treasury shares

When shares recognized as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs, is recognized as a deduction from equity. Repurchased shares are classified as treasury shares. When treasury shares are sold or reissued subsequently, the amount received is recognized as an increase in equity, and the resulting surplus or deficit on the transaction is recognized in capital surplus or retained earnings (if the capital surplus is not sufficient to be written down).

4) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

5) Derecognition of financial liabilities

The Group derecognizes a financial liability when its contractual obligations are discharged, cancelled, or expired. The Group also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

6) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

(iii) Derivative financial instruments and hedge accounting

The Group holds derivative financial instruments to hedge its foreign currency and interest rate exposures. Embedded derivatives are separated from the host contract and accounted for separately if the host contract is not a financial asset and certain criteria are met. Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognized in profit or loss.

Notes to the Consolidated Financial Statements

(h) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is calculated using the weighted average method, and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expense.

The cost of inventories transferred from biological assets is its fair value less costs to sell at the date of harvest.

(i) Biological assets

Biological assets are measured at fair value less costs to sell on initial recognition and at the end of each reporting period. Costs to sell are the incremental costs directly attributable to the disposal of the assets, excluding finance costs and income taxes. Gains and losses arising on initial recognized of biological assets at fair value less costs to sell and from changes in fair value less costs to sell of biological assets are recognized in profit or loss for the period in which they arise.

(j) Investment in associates

Associates are those entities in which the Group has significant influence, but not control or joint control, over their financial and operating policies.

Investments in associates are accounted for using the equity method and are recognized initially at cost. The cost of the investment includes transaction costs. The carrying amount of the investment in associates includes goodwill arising from the acquisition less any accumulated impairment losses.

The consolidated financial statements include the Group's share of the profit or loss and other comprehensive income of those associates, after adjustments to align their accounting policies with those of the Group, from the date on which significant influence commences until the date on which significant influence ceases. The Group recognizes any changes of its proportionate share in the investee within capital surplus, when an associate's equity changes due to reasons other than profit and loss or comprehensive income, which did not result in changes in actual proportionate share.

Gains and losses resulting from transactions between the Group and an associate are recognized only to the extent of unrelated Group's interests in the associate.

When the Group's share of losses of an associate equals or exceeds its interests in an associate, it discontinues recognizing its share of further losses. After the recognized interest is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

Notes to the Consolidated Financial Statements

The Group discontinues the use of the equity method and measures the retained interest at fair value from the date when its investment ceases to be an associate. The difference between the fair value of retained interest and proceeds from disposing, and the carrying amount of the investment at the date the equity method was discontinued is recognized in profit or loss. The Group accounts for all the amounts previously recognized in other comprehensive income in relation to that investment on the same basis as would have been required if the associates had directly disposed of the related assets or liabilities. If a gain or loss previously recognized in other comprehensive income would be reclassified to profit or loss (or retained earnings) on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) (or retained earnings) when the equity method is discontinued. If the Group's ownership interest in an associate is reduced while it continues to apply the equity method, the Group reclassifies the proportion of the gain or loss that had previously been recognized in other comprehensive income relating to that reduction in ownership interest to profit or loss.

If an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the Group continues to apply the equity method without remeasuring the retained interest.

When the Group subscribes to additional shares in an associate at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment will differ from the amount of the Group's proportionate interest in the net assets of the associate. The Group records such a difference as an adjustment to investments, with the corresponding amount charged or credited to capital surplus. The aforesaid adjustment should first be adjusted under capital surplus. If the capital surplus resulting from changes in ownership interest is not sufficient, the remaining difference is debited to retained earnings. If the Group's ownership interest is reduced due to the additional subscription to the shares of the associate by other investors, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate will be reclassified to profit or loss on the same basis as would be required if the associate had directly disposed of the related assets or liabilities.

(k) Investment property

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services, or for administrative purposes. Investment property is measured at cost on initial recognition, and subsequently at cost, less accumulated depreciation and accumulated impairment losses. Depreciation expense is calculated based on the depreciation method, useful life, and residual value which are the same as those adopted for property, plant and equipment.

Any gain or loss on disposal of an investment property (calculated as the difference between the net proceeds from disposal and the carrying amount) is recognized in profit or loss.

Rental income from investment property is recognized as other revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognized as an integral part of the total rental income, over the term of the lease.

Notes to the Consolidated Financial Statements

(1) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(ii) Reclassification to investment properties

When a property for self-use becomes an investment property, said property should be reclassified as an investment property based on the book value at the time of change.

(iii) Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

(iv) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

Buildings 2 - 60 years

Plant and equipment 2 - 60 years

Transportation equipment 3 - 10 years

Other equipment 2 - 25 years

Leasehold improvement According to leasehold period

Leased assets According to leasehold period

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Notes to the Consolidated Financial Statements

(m) Leases

(i) Identifying a lease

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- the contract involves the use of an identified asset this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified; and
- 2) the customer has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- 3) the customer has the right to direct the use of the asset throughout the period of use only if either:
 - the customer has the right to direct how and for what purpose the asset is used throughout the period of use; or
 - the relevant decisions about how and for what purpose the asset is used are predetermined and:
 - the customer has the right to operate the asset throughout the period of use,
 without the supplier having the right to change those operating instructions; or
 - the customer designed the asset in a way that predetermines how and for what purpose it will be used throughout the period of use.

(ii) As a lessee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Notes to the Consolidated Financial Statements

Lease payments included in the measurement of the lease liability comprise the following:

- 1) fixed payments, including in-substance fixed payments;
- 2) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- 3) amounts expected to be payable under a residual value guarantee; and
- 4) payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- 1) there is a change in future lease payments arising from the change in an index or rate; or
- 2) there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee; or
- 3) there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset; or
- 4) there is a change of its assessment on whether it will exercise a extension or termination option; or
- 5) there is any lease modification

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Group accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Group presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

If an arrangement contains lease and non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases and leases of low-value assets of other equipment. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Notes to the Consolidated Financial Statements

(iii) As a lessor

When the Group acts as a lessor, it determines at lease commencement whether each lease is a finance lease or an operating lease. To classify each lease, the Group makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease. If a head lease is a short-term lease to which the Group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the Group applies IFRS15 to allocate the consideration in the contract.

The Group recognizes lease payments received under operating leases as income on a straight-line basis over the lease term as part of 'rental income'.

(n) Intangible assets

(i) Goodwill

1) Recognition and measurement

Goodwill arising on the acquisition of subsidiaries is included in intangible assets. Please refer to Note 4(s) for the recognition of goodwill.

2) Subsequent evaluations

Goodwill is measured at cost, less accumulated impairment losses. For investments using the equity method, the book value of goodwill is included in the book value of the investment, and the impairment losses of such investments are not allocated to goodwill or any assets, but are part of the book value of the investment using the equity method.

(o) Impairment of non financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than inventories, contract assets, deferred tax assets and investment properties and biological assets, measured at fair value, less costs) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units (CGUs). Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

Notes to the Consolidated Financial Statements

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(p) Revenue recognition

(i) Revenue from contracts with customers

Revenue is measured based on the consideration to which the Group expects to be entitled in exchange for transferring goods or services to a customer. The Group recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Group's main types of revenue are explained below:

1) Sale of goods – Feed and meat products

The Group manufactures feed and meat products and sells them to customers. The Group recognizes revenue when the control of the product is transferred. The transfer of control of the product means that the product has been delivered to the customer, and the customer can fully determine the sales channel and price of the product without any unfulfilled performance obligations that will affect the customer's acceptance of the product. Delivery occurs when the product is delivered to a specific location, when the customer has accepted the product in accordance with the sales contract, when its risk of obsolescence and loss have been transferred to the customer, when the acceptance clause has expired, or when the combined company has objective evidence that all acceptance conditions have been met.

The Group often provides volume discounts to customers on the basis of cumulative sales within twelve months. The Group recognizes revenue on the basis of the contract price minus the net amount of the estimated quantity discount. The amount of the quantity discount is estimated based on the expected value using past experiences, and only in the range where a significant change will not occur at a high degree. The average credit period for feed and meat sales is 30 to 60 days, which is consistent with industry practices and thus does not include financing elements.

A receivable is recognized when the goods are delivered as this is the point in time that the Group has a right to an amount of consideration that is unconditional.

Notes to the Consolidated Financial Statements

2) IT Consulting services/Advisory and Management

The Group provides business IT management services. Revenue from providing services is recognized in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognized based on the actual service provided to the end of the reporting period as a proportion of the total services to be provided. The proportion of services provided is determined based on the actual labor hours spent relative to the total expected labor hours.

3) Financial components

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the group does not adjust any of the transaction prices for the time value of money.

(q) Employee benefits

(i) Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available.

(ii) Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Notes to the Consolidated Financial Statements

(iii) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(r) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes are recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes are recognized except for the following:

- (i) Temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits (losses) at the time of the transaction;
- (ii) Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- (iii) Taxable temporary differences arising on the initial recognition of goodwill.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date, and reflect uncertainty related to income taxes, if any.

Deferred tax assets and liabilities are offset if the following criteria are met:

- (i) the Group has a legally enforceable right to set off current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
 - 1) the same taxable entity; or
 - 2) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Notes to the Consolidated Financial Statements

(s) Business combination

The Company accounts for business combinations using the acquisition method. The goodwill arising from an acquisition is measured as the excess of (i) the consideration transferred (which is generally measured at fair value) and (ii) the amount of non-controlling interest in the acquiree, both over the identifiable net assets acquired at the acquisition date. If the amount calculated above is a deficit balance, the Company recognized that amount as a gain on a bargain purchase in profit or loss immediately after reassessing whether it has correctly identified all of the assets acquired and all of the liabilities assumed.

All acquisition-related transaction costs are expensed as incurred, except for the issuance of debt or equity instruments.

For each business combination, the Group measures any non controlling interests in the acquiree either at fair value or at the non controlling interest's proportionate share of the acquiree's identifiable net assets, if the non controlling interests are present ownership interests and entitle their holders to a proportionate share of the acquiree's net assets in the event of liquidation. Other components of non controlling interests are measured at their acquisition-date fair values, unless another measurement basis is required by the IFRSs endorsed by the FSC.

In a business combination achieved in stages, the Group remeasures its previously held equity interest in the acquiree at its acquisition-date fair value, and recognizes the resulting gain or loss, if any, in profit or loss. In prior reporting periods, the Group may have recognized changes in the value of its equity interest in the acquiree in other comprehensive income. If so, the amount that was recognized in other comprehensive income will be recognized on the same basis as would be required if the Group had disposed directly of the previously held equity interest. If the disposal of the equity interest required a reclassification to profit or loss, such an amount will be reclassified to profit or loss.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, provisional amounts for the items for which the accounting is incomplete are reported in the Group's financial statements. During the measurement period, the provisional amounts recognized at the acquisition date are retrospectively adjusted, or additional assets or liabilities are recognized to reflect new information obtained about facts and circumstances that existed as of the acquisition date. The measurement period will not exceed one year from the acquisition date.

(t) Earnings per share

The Group discloses the Company's basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding after adjustment for the effects of all potentially dilutive ordinary shares. The Group's potentially dilutive ordinary shares include employee remuneration.

Notes to the Consolidated Financial Statements

(u) Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group). Operating results of the operating segment are regularly reviewed by the Group's chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Each operating segment consists of standalone financial information.

(v) Government subsidies

A government subsidy is recognized when it is reasonably certain that the company will comply with the conditions attached to the government subsidy and will receive the subsidy. The receipt of the subsidy by the enterprise itself is not sufficient to provide conclusive evidence that the completed goods will fulfill the conditions attached to the subsidy.

Government subsidies should be recognized in profit and loss on a systematic basis during the period when the related costs that they intend to compensate are recognized as expenses by the company.

When a government subsidy is receivable, if it is used as compensation for the expenses or losses that have already occurred or for the purpose of providing immediate financial support to the company without future related costs, it shall be recognized in the profit and loss during the period when it can be received.

Asset-related subsidies (including non-monetary subsidies measured at fair value) should be classified as deferred income or as a deduction to obtain the asset's carrying amount, which is expressed in the statement of financial position.

When government subsidies need to be returned, they should be dealt with according to changes in accounting estimates. The return of subsidies related to income shall first be offset against the unamortized deferred credits recognized in connection with the subsidies. When the refund exceeds the scope of any such deferred credit, or when there is no deferred credit, the refund shall be immediately recognized in profit and loss. The return of subsidies related to assets should be recognized by increasing the asset's carrying amount or reducing the balance of deferred income. Assuming that there is no subsidy, the accumulated additional depreciation that should have been recognized in profit and loss so far should be recognized in profit and loss immediately.

(5) Significant accounting assumptions and judgments, and major sources of estimation uncertainty:

The preparation of the consolidated financial statements in conformity with the Regulations and the IFRSs endorsed by the FSC requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The management continues to monitor the accounting estimates and assumptions. The management recognizes any changes in accounting estimates during the period and the impact of those changes in accounting estimates in the following period.

Notes to the Consolidated Financial Statements

Information about judgments made in applying accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements is as follows:

Impairment of property, plant and equipment, and intangible assets

In the process of evaluating the potential impairment of tangible and intangible assets other than goodwill, the Group is required to make subjective judgments in determining the independent cash flows, discount rate, useful lives, expected future income and expenses related to the specific asset groups considering of the nature of the industry. Any changes in these estimates based on changed economic conditions or business strategies and could result in significant impairment charges or reversal in future years.

Please refer to note 6(ac) for the interest rate risk and the sensitivity analysis of financial assets and liabilities of the Group.

The details of financial products as of December 31, 2021 and 2020 are as follows:

- (i) On December 2, 2021, the Group entered into an agreement with a bank for a floating rate principal protected note at an amount of \$8,683 thousand, with an expected yield of 3.10% (linked to the three month SHIBOR interest rate), and maturing on January 4, 2022.
- (ii) On October 27, 2021, the Group entered into an agreement with a bank for a floating rate principal protected note at an amount of \$61,692 thousand, with an expected yield of 3.38% (linked to the three month LIBOR (USD) interest rate), and maturing on January 27, 2021.
- (iii) Oon December 9, 2020, the Group entered into an agreement with a bank for a floating rate principal protected note at an amount of \$70,099 thousand, with an expected yield of 2.75% (linked to the three month LIBOR interest rate), and maturing on January 11, 2021.

The Company undertook one year time deposits for its short-term financing, with the intention to fulfill its short-term cash promises instead of using them for investments or other purposes. The above time deposits can be readily transformed into a fixed amount of cash and the risk of their value being volatile is relatively low.

(i) Equity investments at fair value through other comprehensive income

The Group designated the investments shown above as equity securities at fair value through other comprehensive income because these equity securities represent those investments that the Group intends to hold for long-term strategic purposes.

For information on dividends received from the aforementioned equity investments measured at fair value through other comprehensive income as of December 31, 2021 and 2020, please refer to Note 6(ab).

Notes to the Consolidated Financial Statements

The Group has not disposed of any strategic investments in 2021 and 2020. No accumulated profits and losses were transferred as well.

- (ii) For credit risk and market risk, please refer to Note 6(ac).
- (iii) The aforementioned financial assets had not been pledged as collateral for its long-term borrowings.

Sensitivity analysis- equity price risks:

If the price of equity securities changes on the reporting date (the two-period analysis adopts the same basis and assumes that other changing factors remain unchanged), the impact on the comprehensive profit and loss items is as follows:

Notes to the Consolidated Financial Statements

The Group applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due, as well as the incorporated forward looking information, including macroeconomic and relevant industry information. The loss allowance provisions were determined as follows:

| | December 31, 2021 | | | |
|-----------------------------|--------------------------|--------------|--------------|----------------|
| | | | Weighted | |

The Group slaughtered and sold approximately \$156,333,206 and \$135,576,436 units of biological assets in 2021 and 2020, respectively.

(v) Fair value

The fair value of biological assets is based on the most recent market transaction price. However, if there are major changes in economic conditions between the transaction date and the reporting date, the market price of similar assets will be adjusted to reflect the difference. The fair value of livestock to be sold is based on the market price of livestock of similar age, breed and gene. When the market-determined price or value of a biological asset cannot be obtained at the time of initial recognition, and the alternative estimate for determining the fair value is unreliable, the biological asset should be measured at its cost minus all accumulated depreciation and all accumulated impairment losses. The book value of biological assets not measured by fair value is a reasonable approximation of fair value.

The Group is exposed to the following risks related to raising poultry and livestock:

(i) Regulations and environmental risks

The Group has established environmental policies and procedures aimed at compliance with local environmental and other laws. Management performs regular reviews to identify environmental risks and to ensure that systems in place are adequate to manage those risks.

Notes to the Consolidated Financial Statements

(ii) Supply and demand risks

The Group is exposed to risks arising from fluctuations in the price and sales volume of poultry and livestock. When possible, the Group manages this risk by aligning its raising volume with market supply and demand. Management performs regular industry trend analyzes to ensure that the Group's pricing structure is in line with the market and to ensure that projected slaughtering volumes are consistent with the expected demand.

(iii) Climate and other risks

The Group's poultry and livestock raising is exposed to the risk of damage from climate change, diseases, and other natural forces. The Group has extensive processes in place aimed at monitoring and mitigating those risks, including raising animals in a closed environment and conducting regular health checks and disease investigation of poultry and livestock. The Group also insures itself against natural disasters such as floods and hurricanes.

As of December 31, 2021 and 2020, biological assets have not been pledged as collateral.

(n) Investment property

Investment property comprises office buildings that are leased to third parties under operating leases, including properties that are held as right-of-use assets, as well as properties that are owned by the Group. The leases of investment properties contain an initial non-cancellable lease term of 3 to 11 years.

For all investment property leases, the rental income is fixed under the contracts.

The details of investment properties are as follows:

The fair value of investment properties (as measured or disclosed in the financial statements) was based on a valuation by a qualified independent appraiser who has recent valuation experience in the location and category of the investment property being valued. Fair value was measured using the market approach.

Investment properties include several commercial properties leased to others. The leases of investment properties contain an initial non-cancellable lease term of 2 to 9 years. Subsequent lease terms are negotiated with the lessee, and no contingent rent has been collected. For relevant information, please refer to Note 6(u).

The company acquired the Hedong section of Dongshan District, Tainan City (previously land lots #0328-0001 in the Jibeishuan Section, Dongshan Township, Tainan County) for \$313 thousand in 2007. Since they are all agricultural land and cannot be transferred to the Group, property rights are temporarily registered under the individual's name. However, an agreement has been obtained and security measures have been adopted to pledge the land to the Group.

As of December 31, 2021 and 2020, investment properties have not been pledged as collateral.

The Group makes defined benefit plan contributions to the pension fund account with Bank of Taiwan that provides pensions for employees upon retirement. Plans (covered by the Labor Standards Law) entitle a retired employee to receive retirement benefits based on years of service and average monthly salary for the six months prior to retirement.

1) Composition of plan assets

The Group allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labor. With regard to the utilization of the funds, minimum earnings shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

The Group approved the establishment of the "Employee Pension Management Committee" in accordance with Ruling No. 0920015946 issued by the Xinhua Office of the National Taxation Bureau of the Southern Area to transfer retirement funds to the special employee retirement reserve account of the Cooperative Bank Commercial Bank.

The Group's Bank of Taiwan and Taiwan Cooperative Bank labor pension reserve account balance amounted to \$169,253 thousand and \$173,003 thousand as of December 31, 2021 and 2020. For information on the utilization of the labor pension fund assets, including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

| Net interest of net liabilities for defined benefit obligations | | (298) | (672) | |
| Total (Management fee) | \$ | 1,184 | 383 | |

Notes to the Consolidated Financial Statements

5) Remeasurement of net defined benefit liability (asset) recognized in other comprehensive income

The Group's remeasurement of the net defined benefit liability (asset) recognized in other comprehensive income for the years ended December 31, 2021 and 2020, was as follows:

| | For the years ended December 31, | | |
|-----------------------------------|----------------------------------|----------|---------|
| | | 2021 | 2020 |
| Accumulated amount at January 1 | \$ | (8,704) | (6,558) |
| Recognized during the period | | (4,434) | (2,146) |
| Accumulated amount at December 31 | \$ | (13,138) | (8,704) |

6) Actuarial assumptions

The principal actuarial assumptions at the reporting date were as follows:

| | December 31, 2021 | December 31, 2020 |
|-----------------------------|----------------------|----------------------|
| Discount rate | 0.70% | 0.30% |
| Future salary increase rate | 1.00%~2.00% | 1.00%~2.00% |

For the year ended 2021, the expected allocation payment to be made by the Group to the defined benefit plans for the one-year period after the reporting date is \$2,195 thousand.

The weighted average lifetime of the defined benefits plans ranges from 7.5~8.4 years.

7) Sensitivity analysis

The impact on the present value of the defined benefit obligation given some changes in the actuarial assumptions shall be as follows:

| | Influences of defined benefit obligations | | | |
|--|---|-----------|-----------|--|
| | | Increased | Decreased | |
| December 31, 2021 | | | | |
| Discount rate (0.25% change) | \$ | (1,132) | 1,090 | |
| Future salary increasing rate (0.25% change) | | 976 | (944) | |
| December 31, 2020 | | | | |
| Discount rate (0.25% change) | \$ | (1,235) | 1,281 | |
| Future salary increasing rate (0.25% change) | | 1,099 | (1,066) | |

Notes to the Consolidated Financial Statements

| | Influences of defined benefit obligations | | |
|---|---|--------|-----------|
| | Inc | reased | Decreased |
| December 31, 2021 | | | |
| Discount rate (0.1% change) | \$ | (83) | 84 |
| Future salary increasing rate (0.1% change) | | 74 | (73) |
| December 31, 2020 | | | |
| Discount rate (0.5% change) | \$ | (115) | 116 |
| Future salary increasing rate (0.5% change) | | 102 | (101) |

Possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of pension liabilities in the balance sheets.

There is no change in the method and assumptions used in the preparation of sensitivity analysis for 2021 and 2020.

(ii) Defined contribution plans

The Group allocates 6% of each employee's monthly wages to the labor pension personal account at the Bureau of Labor Insurance in accordance with the provisions of the Labor Pension Act. Under these defined contribution plans, the Group allocates a fixed amount to the Bureau of Labor Insurance without additional legal or constructive obligation.

Chinese employees must participate in the retirement pension plan run by the relevant Chinese municipal government; that is, in the relevant year, it must be based on the standard wages determined by the relevant Chinese authorities. In the year of 2021 and 2020, the rates ranged from 14%~16% and 14.5%~16% for annual pension contributions. Except for the aforementioned contributions, the Group does not assume other major responsibilities for the retirement benefits of Chinese employees.

According to the Hong Kong Mandatory Provident Fund Schemes Ordinance, the Group also set up a mandatory provident fund scheme ("MPF Scheme") for employees hired under the Hong Kong Employment Ordinance. The MPF plan is a defined contribution retirement plan managed by an independent trustee. According to the MPF scheme, the Group and its employees contribute 6%~5% of the employee's relevant income to the plan, and the monthly relevant income of the contribution amount is limited to HK\$30,000. Contributions to the plan vest immediately.

In 2021 and 2020, contributions to the Employees' Provident Fund for Malaysian employees is 13% of the employee's salary.

The Group also purchases statutory social security and medical insurance for qualified employees in Vietnam. Contribution ratios in 2021 and 2020 were both 20.5%.

Notes to the Consolidated Financial Statements

The pension costs incurred from the contributions amounted to \$295,492 thousand and \$183,322 thousand for the years ended December 31, 2021 and 2020, respectively.

(w) Income taxes

(i) The components of income tax in the years 2021 and 2020 were as follows:

| | For the years ended December 31 | | | |
|---|---------------------------------|----------|----------|--|
| | | 2021 | 2020 | |
| Current tax expense | | | | |
| Current period | \$ | 745,391 | 987,669 | |

| Undistributed earnings additional tax | 10,190 | | |
| Total | \$624,695 | 911,142 | |

(ii) Deferred tax assets and liabilities

1) Unrecognized deferred tax liabilities

The Group is able to control the timing of the reversal of the temporary differences associated with investments in subsidiaries as of December 31, 2021 and 2020. Also, management considers it probable that the temporary differences will not reverse in the foreseeable future. Hence, such temporary differences are not recognized under deferred tax liabilities. Details are as follows:

| | December 31, | December 31, |
|--|--------------|--------------|
| _ | 2021 | 2020 |
| Aggregate amount of temporary differences related to investments in subsidiaries | 5,875,907 | 5,915,981 |
| Unrecognized deferred tax liabilities \$ | 1,224,060 | 1,232,711 |

2) Unrecognized deferred tax assets

Deferred tax assets have not been recognized in respect of the following items:

| | De | ecember 31, 2021 | December 31, 2020 |
|--|----|---------------------|-------------------|
| Tax effect of deductible temporary differences | \$ | 137,104 | 139,432 |
| The carryforward of unused tax losses | | 350,045 | 412,476 |
| | \$ | 487,149 | 551,908 |

Notes to the Consolidated Financial Statements

The Group follows local tax regulations to offset net losses with taxable income during the first five to ten years for local tax reporting purposes. Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the Group can utilize the benefits therefrom.

3) Recognized deferred tax assets and liabilities

Changes in the amount of deferred tax assets and liabilities for 2021 and 2020 were as follows:

(x) Capital and other equity

As of December 31, 2021 and 2020, the number of authorized ordinary shares were both \$9,900,000 shares with par value of 10 per share while the total value of authorized ordinary shares amounted to 990,000 thousand. As of those dates, 852,159 thousand and 827,339 thousand ordinary shares were issued, respectively.

Reconciliation of shares outstanding for 2021 and 2020 was as follows:

(expressed in thousands)

| | Ordinary shares | | |
|-------------------------------------|-----------------|---------|---------|
| | | 2021 | 2020 |
| January 1, 2021 | \$ | 827,339 | 827,339 |
| Capitalizing undistributed earnings | | 24,820 | |
| December 31, 2021 | \$ | 852,159 | 827,339 |

(i) Ordinary shares

A resolution was passed during the general meeting of shareholders held on July 30, 2021 to transfer an undistributed surplus of \$248,202 thousand into capital increase. With the approval of the Financial Supervisory Commission, the Board of Directors had agreed on setting August 29, 2021 as the allotment date. The relevant statutory registration procedures have since been completed.

Notes to the Consolidated Financial Statements

(ii) Capital surplus

The balances of capital surplus as of December 31, 2021 and 2020, were as follows:

| | De | cember 31, 2021 | December 31, 2020 |
|---|----|--------------------|-------------------|
| Share capital | \$ | 2,252 | 2,252 |
| Treasury share transactions | | 1,781,586 | 1,659,108 |
| Difference arising from subsidiary's share price and its carrying value | | 837,631 | 844,969 |
| Stock options - fair value differences of associates and joint ventures under the equity method | | 66,918 | 66,918 |
| Capital surplus - premium from merger | | 587,144 | 587,144 |
| Other | | 19,235 | 19,235 |
| | \$ | 3,294,766 | 3,179,626 |

According to the R.O.C. Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring capital surplus in excess of par value should not exceed 10% of the total common stock outstanding.

(iii) Retained earnings

The Company's memorandum stipulates that Company's net earnings should first be used to offset the prior years' deficits, if any, before paying any income taxes. Of the remaining balance, 10% is to be appropriated as legal reserve, and then any remaining profit, together with any undistributed retained earnings, shall be distributed according to the distribution plan proposed by the Board of Directors. If the earnings are to be distributed through the issuance of new shares, an approval during the shareholders' meeting is required. The Company authorizes the Board of Directors to distribute the dividends and bonuses or legal reserves and capital surpluses, entirely or partially, as cash dividends. Any decisions should be reported in a meeting of shareholders. The percentage of retained earnings and cash dividends distributed depends on the profit and financial situation of the year, subject to adjustments made in the shareholders' meeting.

1) Legal reserve

When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

Notes to the Consolidated Financial Statements

2) Special reserve

When the company first adopted the IFRSs as approved by the FSC, by application of the exemption under IFRSs No. 1, any unrealized revaluation gains and cumulative translation adjustments (gains) recorded to shareholders equity were reclassified under "Investment property" on the conversion date. The fair value on the conversion date is used as the recognized cost and the amount of retained earnings increased to \$328,719 thousand. In accordance with Ruling No. 1010012865 issued by the FSC on April 6, 2012, for the amount that the company elects to transfer to retained earnings, the company shall set aside an equal amount of special reserve, provided that when, on the date of the adoption of the IFRSs, the increase in retained earnings due to the first-time adoption of the IFRSs is insufficient to set aside the amount specified above, the company may set aside only the amount of the increase in retained earnings resulting from the adoption of the IFRSs. Following this, the company stated an increase of \$42,994 thousand in special reserves. When the company subsequently uses, disposes of, or reclassifies the relevant assets, it may reverse to distributable earnings a proportional amount of the special reserve originally set aside. As of December 31, 2021 and 2020, special reserves amounted to \$42,994 thousand.

In accordance with Ruling No. 1010012865 as stated above, a portion of current-period earnings and undistributed prior-period earnings shall be reclassified as special earnings reserve during earnings distribution. The amount to be reclassified should equal the current-period total net reduction of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as special earnings reserve (and does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

3) Earnings distribution

Cash dividends for the year 2020 and 2019 were decided by the resolution adopted at the board meeting held at March 30, 2021 and March 27, 2020, respectively. Stock dividends for the year 2020 were decided by the resolution adopted at the general meeting of shareholders held at July 30, 2021. The relevant dividend distributions to shareholders were as follows:

| | 2020 | | | 20 | 19 |

(y) Employee compensation and directors' and supervisors' remuneration

In accordance with the memorandum of the Company should contribute no less than 2% of the profit as employee compensation and less than 2% as directors' and supervisors' remuneration when there is profit for the year. However, if the Company has accumulated deficits, the profit should be reserved to offset the deficit. The amount of remuneration of each director and supervisor and of compensation for employees entitled to receive the abovementioned employee compensation is approved by the Board of Directors. The recipients of shares and cash may include the employees of the Company's affiliated companies who meet certain conditions.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2021 and 2020, the Company's estimation for its employee remuneration both amounted to \$90,000 thousand, and directors' and supervisors' remuneration amounted to \$40,000 thousand. The estimated amounts mentioned above are calculated based on the net profit before tax, excluding the remuneration to employees, directors and supervisors of each period, multiplied by the percentage of remuneration to employees, directors and supervisors as specified in the Company's articles. These remunerations were expensed under operating costs or operating expenses during 2021 and 2020. If the actual amounts differ from the estimated amounts, it shall be treated according to the changes in accounting estimates, and the impact of the change shall be recognized as the profit and loss in the next year. If the Board of Directors choose to distribute shares as employee compensation, calculations shall be done one day prior the date of their meeting.

The amounts, as stated in the consolidated financial statements, are identical to those of the actual distributions for 2021 and 2020. Related information would be available on the Market Observation Post System website.

(ii) Credit risk

1) Credit risk exposure

The carrying amount of financial assets and contract assets represents the maximum amount exposed to credit risk. As of December 31, 2021 and 2020, the Group's maximum exposure to credit risk amounted to \$14,755,457 thousand and \$12,364,241 thousand, respectively.

2) Concentration of credit risk

The Group has a broad customer base so there is no significant concentration of transactions with a single customer and the sales area is spread out. Therefore, there was no concentration of credit risk. In order to reduce credit risk, the company also regularly and continuously evaluates the financial position of customers and requires customers to provide collateral when necessary.

(iii) Liquidity risk

The following table shows the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements.

2) Sensitivity analysis

The Group's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on long-term loans and short-term borrowings in foreign currencies. On December 31, 2021 and 2020, a strengthening (weakening) of 1% of the NTD against the USD and the RMB, ceteris paribus, would have increased (decreased) the net profit after tax by \$112,512 thousand and \$78,766 thousand, respectively. The analysis is performed on the same basis for both years.

3) Foreign exchange gain and loss on monetary items

Since the Group has many kinds of functional currency, the information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For relevant information on foreign exchange gain (loss) (including realized and unrealized portions) in the years 2021 and 2020, please refer to Note 6(ab).

(v) Interest rate analysis

Please refer to the notes on liquidity risk management and interest rate exposure of the Group's financial assets and liabilities.

The following sensitivity analysis is based on the exposure to the interest rate risk of derivative and non derivative financial instruments on the reporting date. Regarding assets with variable interest rates, the analysis is based on the assumption that the amount of assets outstanding at the reporting date was outstanding throughout the year. The rate of change is expressed as the interest rate increases or decreases by 1% when reporting to management internally, which also represents the Group management's assessment of the reasonably possible interest rate change.

If the interest rate had increased / decreased by 1 basis points, ceteris paribus, the Group's net income would have increased / decreased by \$42,126 thousand and \$42,905 thousand in 2021 and 2020, respectively. This is mainly due to the Group's borrowing at variable rates and investment in variable-rate bills.

Notes to the Consolidated Financial Statements

(vi) Fair value of financial instruments

1) Fair value hierarchy

The fair value of financial assets and liabilities at fair value through profit or loss, financial instruments used for hedging, and financial assets at fair value through other comprehensive income is measured on a recurring basis. The carrying amount and fair value of the Group's financial assets and liabilities, including the information on fair value hierarchy were as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value, disclosure of fair value information is not required:

2) Valuation techniques for financial instruments measured at fair value

a) Non-derivative financial instruments

A financial instrument is regarded as being quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm' s-length basis. Whether transactions are taking place 'regularly' is a matter of judgment and depends on the facts and circumstances of the market for the instrument.

Notes to the Consolidated Financial Statements

Quoted market prices may not be indicative of the fair value of an instrument if the activity in the market is infrequent, the market is not well-established, only small volumes are traded, or bid-ask spreads are very wide. Determining whether a market is active involves judgment. Measurements of fair value of financial instruments without an active market are based on a valuation technique or quoted price from a competitor. Fair value measured by a valuation technique can be extrapolated from similar financial instruments, the discounted cash flow method, or other valuation technique including a model using observable market data at the reporting date.

If the financial instruments held by the Group have an active market, their fair values are listed as follows according to their categories and attributes:

• For listed companies, financial assets and liabilities traded in an active market have their fair values determined by market price.

If the financial instruments held by the Group do not have an active market, their fair values are listed as follows according to their categories and attributes:

- Equity instruments without a quoted price: Fair value is estimated using comparable company valuation multiples. The main assumption is based on the surplus multiplier derived from the market price from comparable listed companies. This estimate has been adjusted for the discount effect by its lack of market liquidity.
- b) The fair value of derivative financial products is the amount that the Group is expecting to obtain or to pay if it terminates the contract on the reporting date as agreed. It typically includes the unrealized gains and losses of unsettled contracts in the current period. Most of the derivative financial products of the Group have quotations from financial institutions for reference.
- c) Non-financial instruments

For information on the evaluation of biological assets, please refer to Note 6(f). For information on the evaluation of investment properties, please refer to Note 6(n).

3) Transfers between Level 1 and Level 2

There were no significant transfers between Level 1 and Level 2 in both 2021 and 2020.

Notes to the Consolidated Financial Statements

4) Reconciliation of Level 3 fair values

5) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's Level 3 financial instruments measured at fair value mainly include financial assets: equity instruments measured at fair value through other comprehensive profit and loss.

The Company's Level 3 financial instruments measured at fair value possess multiple significant unobservable inputs. The significant unobservable input values of equity instrument investments without an active market are independent of each other, thus, there is no correlation between them.

Quantified information of significant unobservable inputs was as follows:

| Valuation | Significant | between significant unobservable inputs and fair value measurement |

Inter-relationship

Notes to the Consolidated Financial Statements

6) Fair value measurements in Level 3 – sensitivity analysis of reasonably possible alternative assumptions

For fair value measurements in Level 3, changing one or more of the assumptions to reflect reasonably possible alternative assumptions would have the following effects:

| | | | other comprehensive income | | |
|---|-----------|---------|----------------------------|-----------------|--|
| | Input | Changes | Favorable | Unfavorabl e | |
| December 31, 2021 | | | | | |
| Financial assets at fair value through profit or loss | | | | | |
| Equity investment without an active market | P/E Ratio | 5% | 6,601 | (6,601) | |
| December 31, 2020 | | | | | |
| Financial assets at fair value through profit or loss | | | | | |
| Equity investment without an active market | P/E Ratio | 5% | 6,775 | (6,775) | |

The favorable and unfavorable effects represent the changes in fair value, and fair value is based on a variety of unobservable inputs calculated using a valuation technique. The analysis above only reflects the effects of changes in a single input, and it does not include the interrelationships with another input.

(vii) Offsetting financial assets and financial liabilities

The Group has financial instruments transactions applicable to the International Financial Reporting Standards Sections 42 NO. 32 approved by the FSC which required for offsetting. The following tables present the aforesaid offsetting financial assets and financial liabilities:

Notes to the Consolidated Financial Statements

The following likewise discusses the Group's objectives, policies and processes for measuring and managing the above-mentioned risks. For more disclosures about the quantitative effects of these risks exposures, please refer to the respective notes in the accompanying consolidated financial statements.

(ii) Structure of risk management

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework. The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group's Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group's Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

(iii) Credit risk

The Group's main credit risk lies in financial products of cash, equity securities, and accounts receivable. Cash is kept in different financial institutions. Equity securities held are funds issued by listed companies with excellent credit ratings. The company controls the credit risks exposed to each financial institution and believes that the company's cash and equity securities held will not have a significant concentration of credit risk.

1) Trade and other receivables

The company's main potential credit risk comes from financial products in accounts receivable and other receivables. In order to reduce credit risk, the company continuously evaluates the financial position of customers, regularly assesses the possibility of recovering accounts receivable, and makes allowances for doubtful debts. The total loss of doubtful debts is within the management's expectations.

The credit risk exposure of the Group is mainly affected by the individual conditions of each customer. However, management also considers statistical data of the customer base, including the default risk of the customer's industry and country, as these factors may affect credit risk.

The Group's Risk Management Committee has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. Purchase limits are established for each customer and represent the maximum open amount without requiring approval from the Risk Management Committee; these limits are reviewed quarterly. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment basis.

Notes to the Consolidated Financial Statements

The Group's main transaction customers are not new customers, and no impairment loss has been recognized for these customers. When monitoring the credit risk of customers, they are grouped according to their credit characteristics, including whether they are individuals or legal entities, whether they are distributors, retailers or end customers, their respective location, industry, age, expiry date, and previous existing financial difficulties. Customers rated as high risk will be monitored by the credit department.

The Group has set up provisions for doubtful debt to reflect estimates of the losses incurred in accounts receivable and other receivables and investments. The main components of the provision account include specific loss components related to individual major risk insurance, and the combined loss components established for similar asset groups that have occurred but have not been identified. The combined loss provision account is determined based on historical payment statistics of similar financial assets.

2) Investments

The Group places orders of equity securities and trades futures through the centralized market. It is expected that the counterparty will not default, so there is no major credit transaction risk.

The exposure to credit risk for the bank deposits, fixed income investments, and other financial instruments is measured and monitored by the Group's finance department. The Group only deals with banks, other external parties, corporate organizations, government agencies and financial institutions with good credit rating. The Group does not expect any counterparty above fails to meet its obligations hence there is no significant credit risk arising from these counterparties.

3) Guarantees

For more information on the Group's policy to provide financial guarantees as of December 31, 2021 and 2020, please refer to Note 13(a).

(iv) Liquidity risk

The Group's capital and working capital are sufficient to meet all contractual obligations, so there is no liquidity risk caused by the inability to raise funds to fulfill contractual obligations. The changes in the fair value of the investment of the Group are included in the profit and loss statement of the financial assets and the financial assets available for sale have an active market, so it is expected that the financial assets can be quickly sold in the market at a price close to the fair value. The open positions of futures held by the Group can be liquidated in the market at a reasonable price, hence the liquidity risk is very low. The exchange rate of the forward foreign exchange contracts held by the Group has been determined, and there is no significant cash flow risk.

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it always has sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Notes to the Consolidated Financial Statements

The Group aims to maintain the level of its cash and cash equivalents and other highly marketable debt investments at an amount in excess of expected cash flows on financial liabilities (other than trade payables) over the succeeding 60 days. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. As of December 31, 2021 and 2020, the Group's unused credit line amounted to \$9,238,273 thousand and \$11,910,374 thousand, respectively.

(v) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Equity securities held by the Group mainly include financial assets whose fair value changes are included in profit and loss. Therefore, such assets are measured by fair value. Subsequently, the company will be exposed to the risk of price volatility in the equity securities market.

The Group's forward foreign exchange contracts are of a hedging nature, and the profits and losses arising from changes in interest rates or exchange rates will roughly offset the profits and losses of the hedged project, so the market price risk is not significant.

The Group engaged in futures and option trading contracts, and had set a stop loss point based on risk during operation. As the loss incurred can be controlled within the expected range, the market price risk is not significant to the company as a whole and can be reasonably expected.

The fair value of bank financial products invested by the Group will fluctuate according to market interest rates, so the Group will be exposed to the risk of changes in market prices.

1) Currency risk

The Group is exposed to currency risk on sales, purchases, and borrowings that are denominated in a currency other than the respective functional currencies of the Group's entities, primarily the NTD, US Dollar (USD), and Chinese Yuan (RMB). The currencies used in these transactions are the NTD, USD, and RMB.

At any point in time, the Group hedges its estimated foreign currency exposure with respect to its forecast sales and purchases over the following six months. The Group also uses forward exchange contracts with a maturity of less than one year from the reporting date to hedge its currency risk.

For group companies that use NTD as their functional currency, all USD loans borrowed will be hedged using forward contracts with the same maturity date as the loan repayment date.

Loan interest is priced in the currency of its principal. Typically, the currency of the loan is the same as the currency of the cash flow generated by the operation of the Group, mainly denominated in NTD, but sometimes in USD or RMB. In this case, economic hedging is provided without the need to sign derivatives, so hedging accounting is not adopted.

Notes to the Consolidated Financial Statements

Regarding other monetary assets and liabilities denominated in foreign currencies, the Group buys or sells foreign currencies at real-time exchange rates to ensure that the net exposure risk remains at an acceptable level when short-term imbalances occur.

2) Interest rate risk

On December 31, 2021 and 2020, the short-term and long-term borrowings of the Group consisted of debts with floating interest rates. Therefore, changes in market interest rates will cause the effective interest rates of short-term and long-term borrowings to change accordingly. For detailed interest rate analyses with respect to fluctuations in future cash flows, please refer to Note 6(ac).

3) Other market price risk

The Group is exposed to equity price risk due to the investments in equity securities. This is a strategic investment and is not held for trading. The Group's exposure to equity price risk is mainly due to the equity financial instruments within the food industry on Taiwan's local stock exchange. In addition to meeting the expected consumption and sales demand, the Group has not signed any commodity contracts; these commodity contracts are not delivered on a net basis.

(ae) Capital management

The board of directors' policy is to maintain a sound capital base to preserve the confidence of investors, creditors, and the market in order to support the development of future operations. Capital includes share capital, capital reserves, retained earnings, non-controlling interests and net liabilities of the Group. The board of directors controls the debt-to-capital ratio and at the same time controls the level of ordinary stock dividends.

The Group's debt-to-equity ratios at the end of the reporting period as of December 31, 2021 and 2020, are as follows:

| | De | December 31, 2020 | |
|---------------------------------|----------|----------------------|-------------|
| Total liabilities | \$ | 28,992,521 | 23,806,284 |

(vii) Leases

The Group leased its buildings used for production and its premises to related companies in January 2015, and signed a 15-year lease contract with a 30-year depreciation period based on the book value (the residual value withdrawal ratio is 5%). The calculated depreciation expenses are used as rent, and the annual rent calculation formula for the first five years = book value (1/5%)/30. In the last ten years of the lease, in addition to the depreciation expenses mentioned above, the cost of funds calculated at the beginning of the year based on the book value of the premises and the one-year benchmark loan interest rate of the People's Bank of China is added as the rent. Annual rent calculation for the next ten years = book value (1 5%)/30 + capital cost of the nth year. Moreover, for office buildings leased to related companies, the contracts are signed every year, and the monthly rent is calculated based on the leased area and the actual monthly utility bill. The company revised the contract on July 26, 2016. In order to support the development of related parties and reduce their operating expenses, the lease period of the office building was changed to July 1, 2015 to December 31, 2019. Rent was also reduced to 0. On January 1, 2020, the company revised its contract again in order to support the development of related parties and reduce their operating expenses. The lease period of the office building was revised to January 1, 2020 to December 31, 2020. Rent was also reduced by RMB 4,447 thousand. Rental income for 2021 and 2020 amounted to \$13,777 thousand and \$14,382 thousand (tax included). As of December 31, 2021 and 2020, there were no outstanding payments.

The Group leased its buildings used for production and its premises to other related parties in January 2014 and signed a lease contract. On December 1, 2018, the contract was revised to \$225,000 thousand (tax included) collected on a quarterly basis from January 1, 2019. Rental income for the year ended 2021 and 2020 amounted to 11,877 thousand and 10,026 thousand (tax included), respectively. - Note 1: Guarantees and endorsements for other parties are classified into six types of relationships as follows:
 - 1. For those with business dealings.
 - 2. For subsidiaries with over 50% of common shares.
 - 3. When the parent company and its subsidiaries own more than 50% of common shares of the invested company.
 - 4. When the parent company owns more than 50% of common shares of the company either directly or indirectly through its subsidiaries.
 - 5. For those in the same industry who are contractually obligated to endorse each other due to projects.
 - 6. For companies that are endorsed and guaranteed by each investor based on their shareholding ratio due to joint ventures.
 - 7. For companies in the same industry engaged in pre-sale house sales contracts who are contractually obligated to provide guarantees and endorsements in accordance with the Consumer Protection Act.
- Note 2: The total amount of guarantees and endorsements for other parties must not exceed the Company's total net worth, while guarantees and endorsements for individual entities must not exceed 50% of the Company's net worth.
- Note 3: For subsidiaries, the total amount of guarantees and endorsements for other parties must not exceed double its total net worth and must not be higher than the Company's total net worth. Guarantees and endorsements for individual entities must not exceed the subsidiary's total net worth, and must not be higher than 50% of the Company's total net worth.

(14) Segment information:

The Group has six reportable segments as follow. The reportable segments are the Group's strategic divisions. They offer different products and services, and are managed separately because they require different technology and marketing strategies. The chief operating decision maker of the Group reviews the internal management reports of each strategic operating unit at least quarterly.

- (a) Grain Segment: Vertically integrated production and sales of feed, flour, fermented soybean meal, pork, and laying hens.
- (b) Meat Segment: Vertically integrated production and sales of white broilers, native chickens, and ducks in Taiwan.
- (c) Food segment: Department of manufacturing and sales of processed food.
- (d) Catering and shopping malls segment: Department of catering services and shopping mall operations.
- (e) Southeast Asia Segment: Production and sales of aquatic products and feed in Southeast Asia.
- (f) East Asia Segment: A listed entity listed based in Hong Kong.

Other operating activities include investments in various industries and management consulting services. These departments did not meet any quantitative thresholds to be reportable segments in 2021 and 2020.

The Group's operating segment information and reconciliation are as follows:
